Eat plenty of eggs, says the Department of Agriculture in one of its bulletins, and avoid rheumatism. The eggs contain nothing, says the bulletin, which can be converted into uric acid, and this acid is one of the causes of rheumatism, it is thought.

You can eat an egg and get all the protein into your system that comes from eating meat, and, besides, eggs are full of "vitamins," whatever that is. In fact, the egg is a little bundle of concentrated pep, the only thing not being unable to be the shell. The egg is said to have 97 per cent food value.

"But," as one man ventured, "you can eat eggs to prevent the rheumatism, and you can put a million dollars in the bank to keep from being a pauper. Obtaining the preventives is the trouble."

Kidneys Never
Cause Backache

Rub pain, soreness and stiffness right out with "St. Jacobs Oil."

Kidneys cause backache? No! They have no nerves, therefore can not cause pain. Listen! Your backache is caused by lumbago, sciatica or a strain, and the quickest relief is soothing, penetrating "St. Jacobs Oil." Rub it right on the aching or tender spot, and instantly the pain, soreness, stiffness and lameness disappears. Don't stay crippled! Get a small trial bottle of "St. Jacobs Oil" from your druggist and limber up. A moment after it is applied you'll wonder what became of the backache, sciatica, or lumbago pain. "St. Jacobs Oil" stops any pain at once. It is harmless and doesn't burn or discolor the skin. It's the only application to rub on a weak, lame or painful back, or for lumbago, sciatica, neuralgia, rheumatism, sprains, or a strain.—Adv.
